iCAP Working Group

March 6, 2015

4:00 pm

Rob Fritz, Morgan Johnston, Ben McCall, Nancy O’Brien

High level comments

1a. Aspirational goals: increased renewable energy production, distill and summarize.

Are 2015 iCAP goals in addition to 2010 goals? Maybe include a table comparing 2010 to 2015. Need to come to an agreement on what is aspirational, what are new goals? How they informed the potential strategies.

b. Introduction should include progress since 2010

c. Adjectives like impressive, aggressive, significant, etc.

Refrain from persuasive; remove the emotion.

Find and replace the adjectives as mentioned above (Stephanie).

2. Existing technology – fleet, dining services, nitrates.

What about the numbers from 2010, ie 25% renewable by 2025. Are they still valid?

3. Okay

5. Could, should – Who is responsible for tasks; if we don’t specify....

Saying campus is too generic. Acknowledge that some tasks need to be assigned.

If the iWG wants a task to be done, then it should be listed as an objective rather than a potential strategy. Morgan will add an explanatory paragraph in the introduction.

Adjournment 5:00 pm
