RE: Trans003 Sustainable Transportation Coordinator

Hello iWG,

Thank you for your support of hiring a staff person to handle active and sustainable transportation education and encouragement to reduce single occupancy vehicles on campus. Through the continuous efforts of F&S staff, as well as strong advocacy from the sustainability and bicycle community, we have again received funding in support of the Campus Bike Center for FY16. The Campus Bike Center manager, James Roedl, will also begin reporting to Stacey DeLorenzo, under F&S Engineering and Transportation Services.

We have not yet received a response from campus administration about the overall bicycle funding request for long-term funding. The F&S Engineering and Transportation Services division did get permission to fund a single year for an Active Transportation Coordinator starting as soon as possible. This will be a Visiting Academic Professional position, reporting to Stacey DeLorenzo.

Please let me know if you have any questions.

Thanks,

Morgan B. Johnston
